DETAILED ACTION

1. This Action is in response to the Amendment and Reply received 04 September 2003.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 49-76 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. Applicant's specification lacks the proper teachings that is critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). Applicant claims digital encoded media data throughout the claim language as well as media data buffer. Applicant only describes within the specification metadata that may include text, captions, still image data. However, nowhere within the specification does it teach digital encoded media data or a media data buffer. But the essentials to the making of applicant's invention are not set forth within the specification. It would require undue experimentation for one of ordinary skill in the networking art at the time the invention was made to determine the details of how to receive digital encoded media data.
